

MALWARE PREVENTION

Prevent ransomware and other malware attacks.

99% REAL-TIME DETECTION

Identify & stop attacks before they even start

Unprotected laptops are 5.5x more likely to be infected by a virus

ML-DRIVEN PREVENTION

Machine Learning (ML) enables precision in blocking & quarantining advanced threats

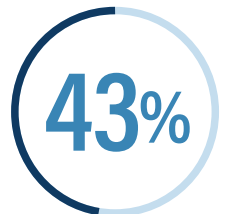

4,000 new ransomware attacks have occurred daily for the last 5 years

SECURITY EXPERTISE

Our 24x7 SOC manages & monitors everything

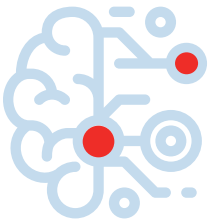

Traditional anti-virus solutions are effective against only 43% of malware attacks

Traditional AV solutions rely on cloud databases of malware signatures to determine if a file is safe or malicious in nature

With new malware emerging every 4.2 seconds, how can you **stay protected?**

AI-driven threat protection

Advanced defense against fileless attacks

Real-time, effective threat detection
