

NEXT-GENERATION FIREWALL

High performance, industry-leading security protection.

REDUCE ATTACK SURFACE

Effectively manage attack vectors with leading threat protection

Our next-generation firewalls have proven security effectiveness

99%

REGULATORY COMPLIANCE

Meet requirements such as PCI, FFIEC, HIPAA, & GDPR

100%

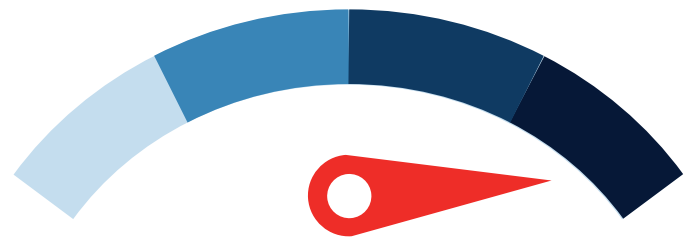

block rate for exploits & web-borne malware

Industry-leading throughput speeds made possible for your organization

TRUSTED APP ACCESS

Secure business applications & implement adaptive access control

Detect and block **sophisticated threats** with Next-Generation Firewall technology.

APPLICATION FIREWALL

Controls input, output, and access on the network.

DEEP PACKET INSPECTION (DPI)

Advanced filtering that evaluates network traffic beyond basic header inspection, blocking malicious traffic from passing through.

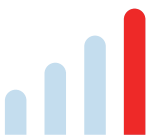

INTRUSION PREVENTION SYSTEM (IPS)

Actively examines network traffic and prevents vulnerability exploits.

WEBSITE FILTERING

Prevents users from accessing sites that are likely to host malicious content or trigger web-based attacks.

QUALITY OF SERVICE (QOS) BANDWIDTH MANAGEMENT

Controls and allocates network traffic in accordance with traffic type, applications, and users.

ANTI-VIRUS INSPECTION

Scans network traffic for viruses — blocking known threats before they enter your network.

VIRTUAL PRIVATE NETWORK (VPN)

Allows authenticated user-access through a secure connection.
